Skills

Languages: Java, Python, JavaScript, ASP.NET

Frontend: HTML, CSS, React.js, Dotnet, Next.js, Angular, Bootstrap, Redux, TypeScript

Backend: RESTful API Development, Node.js, Express.js, Microservices Architecture

Databases: MySQL, MongoDB, PostgreSQL, SQL

CS Fundamentals: Data Structures & Algorithms (DSA), OOPs, DBMS, Operating Systems

Certifications: HackerRank 5 star (Problem Solving), Salesforce Training (Honeywell), React (Internshala), Data Mining (NPTEL), Java11 Beyond Basic (Infosys)

Education

Bachelor of Engineering: Computer Science, Chandigarh University

2020 – 2024

CGPA: 7.90

Experience

Full Stack Developer, COOX, Noida, IN

December 2025 – Present

- Developed scalable full-stack features for web and mobile platforms using React.js, Node.js, and Express.js.
- Optimized application performance, improved database queries, and enhanced user experience through responsive UI development.

Software Developer, Primafelicitas, Noida, IN

February 2025 – November 2025

- Developed scalable backend APIs using Node.js and Express.js for enterprise web applications.
- Collaborated with cross-functional teams to integrate frontend and backend services, ensuring seamless data flow and system reliability.

Software Developer Intern, PerfectCode Software Technologies, Noida, IN

January 2024 – January 2025

- Developed responsive user interfaces using React.js, JavaScript, and Tailwind CSS.
- Built reusable UI components and contributed to the maintenance and enhancement of React.js applications.

Projects

PMR Welfare Foundation

React.js, CSS, Radix UI, Zod, Axios, FastAPI, Python, Uvicorn, JWT Authentication, Passlib, Bcrypt, ReportLab

Live

- Architected and deployed a full-stack web platform serving educational programs, internship registrations, online examination modules, and community welfare initiatives for a non-profit organization.
- Engineered responsive UI components with robust form validation, secure authentication workflows, and data-driven dashboards, significantly improving user engagement and platform accessibility.

Hobbeme Vendor Panel – Business Management Dashboard

React, Node.js, Express.js, PostgreSQL, Docker, AWS S3, OneSignal

Live

- Developed a vendor dashboard using React with reusable components and React Hooks, improving performance and maintainability.
- Integrated AWS S3 for scalable cloud storage, OneSignal for real-time push notifications, and automated data parsing pipelines to streamline core business operations.

Research Publications

Facial Emotion Detection using Haar Cascade and CNN Algorithm

- Built a CNN-based emotion detection pipeline including image preprocessing, model training, evaluation, and performance analysis.
